Average flow: 7.80 tyres/min | Best completed-slot flow: 8.00 tyres/min

Best day: 2026-10-30 | Previous working day (29 Oct 2026): 5,500 tyres

No-count review and supervisor responses

1 count gap of 10+ minutes (18.1 minutes combined). A count gap does not establish conveyor stoppage or camera availability.

Count gap starts (Brisbane)	Ends	Minutes
30 Oct 08:59:52	30 Oct 09:18:00	18.1

Incident / Brisbane time	Status / supervisor	Reason / comments
NC-20261030-091000 2026-10-30 09:00:00	COMPLETED Site supervisor	Scheduled maintenance Inspection completed; production resumed at 09:18.

Foreign-object alerts - trial model

0 recorded live OAK alerts. Supported trial classes: wheel rim and person. Test alerts are excluded; zero records do not establish that monitoring was enabled.

Recorded footage and audit trail

0 matching timestamped MP4 files found in the recording folder. Use the report times to review the corresponding footage; file presence does not verify continuous coverage.

Recording references: None found.

This report uses stored production counts. Camera uptime is not measured by this report. Review labels and recorded footage to support ongoing model improvements.
